

Museum Experience

The National Canal Museum offers hands-on exhibits about the science, technology, engineering and human experience behind the building and operation of the Lehigh and Delaware canals of the 1800s. Students will be grouped into small groups and work through stations throughout the museum with museum educators. Teachers can choose from a menu of a la carte activities to add on more hands on and living history activities to your day.

Accommodations?	Handicap accessible
Other information:	Boat rides and use of the park is available depending on the season. Each field trip is customized to the school so it is best to contact the D&L for more information.

Delaware and Lehigh National Heritage Corridor

The Delaware and Lehigh National Heritage Corridor preserves and interprets the 165-mile transportation route between Wilkes-Barre and Bristol, Pennsylvania including Easton's Hugh Moore Park. With two miles of restored Lehigh Canal, a canal boat attraction and a canal heritage museum, the 520-acre park nestled between the Lehigh Canal and Lehigh River is a throwback to the years when mules pulling canal boats on narrow towpaths was a common sight. The D&L interprets this fascinating period of American history in the park through tours of the National Canal Museum, programming and rides on the 110-passenger Josiah White II canal boat.
